The amendment filed October 19, 2004 has been entered and made of record as paper no. 1004.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim 30 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 30, "the barrier metal layer" has no antecedent basis.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 29 is rejected under 35 U.S.C. 102(e) as being anticipated by Cunningham.

Cunningham discloses a semiconductor device comprising a copper bonding pad (3), an insulating layer (2 or 6), a copper seed metal layer (11), and a copper stud (12) having a top surface and a side surface. Note paragraph [0020] of Cunningham.

Claims 1-11 and 28 are allowed.

The other reference is cited to show other structure pertinent to Applicants' disclosure.
